TROPICAL CYCLONE BULLETIN NO. 3

Tropical Depression "FLORITA"

Issued at 11:00 PM, 21 August 2022

Valid for broadcast until the next bulletin at 5:00 AM tomorrow

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
1 (Strong winds prevailing or expected within the next 36 hours)	The northern portion of Aurora (Dilasag), the northern and eastern portions of Isabela (Dinapigue, Palanan, Divilacan, Maconacon, San Pablo, Cabagan, Tumauini, Ilagan City, San Mariano, Benito Soliven, City of Cauayan, Naguilian, Gamu, Quirino, Delfin Albano, Santo Tomas, Santa Maria, Quezon, Mallig, Burgos, Reina Mercedes, Luna, Aurora, Roxas, Cabatuan, San Manuel), and the eastern portion of Cagayan (Peñablanca, Baggao, Gattaran, Lal-Lo, Gonzaga, Santa Ana, Santa Teresita, Buguey, Aparri, Camalaniugan, Alcala, Amulung, Iguig, Solana, Tuguegarao City, Enrile)	-	-
	Potential impacts of winds: Minimal to minor threat to life and property		

HAZARDS AFFECTING LAND AREAS
<p>Heavy Rainfall</p> <ul style="list-style-type: none"> • Until tomorrow evening: Light to moderate with at times heavy rains are possible over Cagayan, Isabela, Batanes, and Aurora. • Tomorrow evening through Tuesday evening: Heavy to intense with at times torrential rains over Cagayan, Isabela, Batanes, Cordillera Administrative Region, and Ilocos Region. Moderate to heavy rains over the northern portion of Aurora and the rest of Cagayan. Light to moderate with at times heavy rains over the rest of Central Luzon. • Under these conditions, scattered to widespread flooding (including flash floods) and rain-induced landslides are expected especially in areas that are highly or very highly susceptible to these hazard as identified in hazard maps, and in localities with significant antecedent rainfall. <p>Severe Winds</p> <ul style="list-style-type: none"> • Strong winds (strong breeze to near gale strength) will be experienced within any of the areas where Wind Signal no. 1 is currently in effect. • In the next 24 hours, gusts reaching strong breeze to near gale strength may be experienced (especially in the coastal and mountainous areas) over Bicol Region, Batangas, Mindoro Provinces, Marinduque, Romblon, Northern Samar, and Aklan as FLORITA begins to enhanced the prevailing Southwest Monsoon. • Areas where Wind Signals are hoisted will be expanded in succeeding bulletins, while the hoisted wind signals in some localities of the country will likely be upgraded as "FLORITA" moves closer. The hoisting of TCWS #2 is likely in some localities over the eastern section of Northern Luzon as early as tomorrow morning. Based on the track and intensity forecast, the highest possible wind signal that may be hoisted throughout the passage is TCWS #3.
HAZARDS AFFECTING COASTAL WATERS
<p>In the next 24 hours, the tropical depression will bring moderate to rough seas (1.2 to 3.1 m) over the northern and eastern seaboard of Luzon. These conditions may be risky for those using small seacrafts. Mariners are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating in these conditions.</p>

TROPICAL CYCLONE BULLETIN NO. 3

Tropical Depression “FLORITA”

Issued at 11:00 PM, 21 August 2022

Valid for broadcast until the next bulletin at 5:00 AM tomorrow

TRACK AND INTENSITY OUTLOOK

- Tropical Depression “FLORITA” will continue moving generally west southwestward or westward in the next 12 hours before turning west northwestward or northwestward tomorrow afternoon or evening. On the forecast track, the tropical cyclone is forecast to maintain this heading until it makes landfall in the vicinity of the east coast of Cagayan or northern Isabela on Tuesday afternoon or evening. Afterwards, the center of FLORITA will traverse the Babuyan Channel and may pass very close of make landfall in the vicinity of Babuyan Islands in the early morning of Wednesday before emerging over the West Philippine Sea.
- “FLORITA” is forecast to reach tropical storm category tomorrow morning or afternoon and may reach peak intensity of 95 km/h on Tuesday afternoon or evening prior to making landfall. There is a potential for slight weakening as FLORITA crosses the northern portion of Northern Luzon due to frictional effects of the rugged terrain, but the tropical cyclone will likely remain a high-end Tropical Storm or a low-end Severe Tropical Storm throughout the passage.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
